

***Are you interested in participating in research?***

*or*

***Do you have difficulties remembering due to a diagnosis of multiple sclerosis (MS) or traumatic brain injury (TBI)?***

***If so, you are invited to participate in a new study examining the relationship between brain activity and thinking ability in MS and TBI.***

Eligibility requirements:

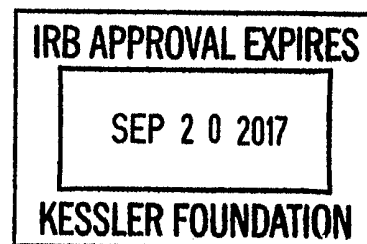

- ✓ Diagnosed with multiple sclerosis (MS)
- ✓ Diagnosed with traumatic brain injury (TBI)
- ✓ Not diagnosed with MS or TBI (Healthy control subjects)
- ✓ Are between the ages of 18 to 65
- ✓ Have no other neurological illness

What does it require?

This study includes two parts on different days. The first visit will include computer along with paper and pencil tests of your thinking ability (3 hours). The second visit will include similar tasks including a MRI scan (3 hours). Compensation for the first day is \$50 and the second day is \$75 with both days being required.
